

TO IRISH RAIL WORKERS

Have Your Say on the Depot Access Road

The new Rail Depot at Ballyrichard, Carrigtwohill
Your route to work matters to Ballyrichard residents

Object to Option 7 before Friday 12 June 2026

WHAT OPTION 7 MEANS FOR YOUR DAILY COMMUTE

Roughan & O'Donovan engineers, contracted by Irish Rail, assessed **8 access road options** and rated Option 7 highest — but only by a **narrow margin**. If Option 7 is chosen, staff driving to the depot from the west must travel **into Midleton, out to Waterrock, through Ballyrichard**, then to the car park on the **Carrigtwohill side** of the depot. The Waterrock level crossing is also expected to **close**, adding further congestion to Midleton and Waterrock at every shift change.

THE HARM OPTION 7 CAUSES

Option 7 is the **only option** that requires the **destruction of residential gardens and mature native trees** in Ballyrichard. Residents here never objected to the depot. We accepted the night works, road closures and disruption of Phase 2 rail construction — because we believe in public transport. We strongly object to one decision: **routing a staff-only access road through our gardens** when better alternatives were assessed and are available.

HOW TO HAVE YOUR SAY — BEFORE FRIDAY 12 JUNE 2026
